WONG JUN YONG

BUSINESS ANALYTICS UNDERGRADUATE | AI, RAG & INTELLIGENT AUTOMATION | DATA ANALYTICS & BI

+60 13-994 1188 • wongjunyong30@gmail.com • Petaling Jaya, Selangor • linkedin.com/in/wongjunyong11

PROFESSIONAL SUMMARY

Final-year Business Analytics undergraduate with practical experience in ERP implementation simulation, business intelligence and AI application development. Applied the ERP Implementation Lifecycle to system configuration, end-to-end Procure-to-Pay and Order-to-Cash workflows, transaction validation and Power BI analytics. Developed SmartOps AI, a RAG–LLM maintenance support system integrating grounded responses, human review and API deployment. Skilled in translating business requirements into integrated solutions, supported by analytical thinking, process improvement and SCRUM-based web development.

CORE SKILLS

Data & Analytics: Python, SQL, Excel, Pandas, Scikit-learn, EDA, Financial Analysis
Business Intelligence: Power BI, Tableau, Dashboard Development, Data Visualization, KPI Analysis
AI & RAG-LLM: RAG, LLM, Hybrid Retrieval, BM25, Vector Search, ChromaDB, Cross-Encoder Reranking, Prompt Engineering
Systems & Automation: FastAPI, REST API Integration, MySQL, Human-in-the-Loop (HITL), Governed Decision Workflows
Business: Transfer Pricing, Comparable-Company Research, Business Analysis, Process Improvement, Stakeholder Collaboration, ERP Implementation Life Cycles

SOFT SKILLS

- **Communication & Understanding Needs:** Listens to guests, users, and stakeholders to understand the real problem and find practical solutions.
- **Improving Work Processes:** Looks for repetitive work and finds simpler or automated ways to save time and keep work consistent.
- **Solving Problems Quickly:** Handles unexpected issues calmly and quickly, including guest requests, maintenance problems, vendor delays, and project challenges.
- **Time & Resource Management:** Organizes schedules, priorities, vendors, and limited resources to keep daily operations running smoothly.

PROFESSIONAL EXPERIENCE

Transfer Pricing Intern **Jan 2026 – Mar 2026**

Grant Thornton Malaysia PLT

- Conducted transfer pricing benchmarking and comparable-company research to support client engagements and documentation.
- Analyzed company financial information and performed ratio analysis for transfer pricing studies and industry comparisons.
- Supported preparation of Transfer Pricing Documentation (TPD) and engagement research in accordance with internal methodology and applicable requirements.
- Cleaned, organized, and analyzed financial and company data in Excel while maintaining accuracy, quality, and confidentiality.

Homestay Operator | Independent Business Owner **Jun 2023 – Present**

Independent Homestay / Airbnb Operations

- Managed end-to-end homestay operations, including Airbnb listing management, reservations, guest relations, pricing decisions, check-in coordination, housekeeping, and vendor coordination.
- Automated booking and guest communication workflows using standardized responses and digital tools to reduce repetitive administration and improve response consistency.
- Resolved time-sensitive property incidents, maintenance issues, vendor delays, access problems, and urgent guest requests to maintain service continuity.
- Coordinated third-party vendors and service providers while balancing guest expectations, operational cost, property availability, and service quality.

LEADERSHIP EXPERIENCE

Youth Team Leader | **PJ Character & Talent Building Program (PJ 品格才艺班)**

- Led workshops for children focused on character development, emotional intelligence, and communication every Saturday.
- Translated abstract concepts into clear, engaging learning activities for young audiences.
- Coordinated volunteer teams, resolved interpersonal issues, and supported smooth group operations.

SELECTED PROJECT EXPERIENCE

SmartOps AI — Governed RAG-LLM Maintenance Decision Support System **2026**

Final Year Project | Sunway University

Technologies: Python, Llama 3.1 8B, Groq API, ChromaDB, BM25, BGE Embeddings, Cross-Encoder Reranking, FastAPI, MySQL

- Designed an end-to-end AI decision-support workflow that converts unstructured hotel maintenance complaints into evidence-grounded recommendations and governed operational routes.
- Built a parent–child maintenance knowledge base and hybrid retrieval pipeline combining dense BGE embeddings with BM25 sparse retrieval, weighted fusion, and cross-encoder reranking.
- Validated retrieval on a frozen benchmark of 490 synthetic queries across 98 maintenance scenarios, achieving 90.20% post-rerank Hit@5; separately achieved 100% parent–child context reconstruction across 510 retrieval-eligible complaints.
- Engineered a bounded Generate–Verify–Ground–Repair LLM assurance loop with semantic verification, deterministic claim-level grounding, one evidence-constrained repair cycle, and fail-closed controls.
- Evaluated the complete pipeline on 50 cases: 45 reached LLM generation and achieved final evidence validity; deterministic governance automatically released 32/45 while retaining human authority for 13/45.
- Integrated the RAG-LLM pipeline with the SmartOps operational prototype through FastAPI and MySQL, supporting complaint intake, admin review, technician workflows, and structured API handoff.

ERP Implementation Simulation — End-to-End Business Process Integration **2025**

Campbell | Academic Project

- Applied the ERP implementation lifecycle to a company simulation, covering requirements analysis, system configuration, transaction testing and documentation across six material flows.
- Configured and executed end-to-end Procure-to-Pay and Order-to-Cash workflows, from purchase requests to supplier payments and sales orders to customer payment receipts.
- Analysed how purchasing, sales and inventory transactions affect accounting entries, payables, receivables and financial statements.
- Developed Power BI dashboards for procurement, sales and accounting analytics to support operational and financial decision-making.
- Validated transaction accuracy and consistency across ERP modules and analytical reports.

ACHIEVEMENTS

Capstone Project Showcase Champion **2026**

SmartOps AI | Sunway University

- Awarded Champion for SmartOps AI, a governed RAG-LLM maintenance decision-support system, at the Sunway University Capstone Project Showcase.

EDUCATION

Bachelor of Business Analytics **Sep 2023 – Sep 2026**

Sunway University, Malaysia

Current CGPA: 3.30 / 4.00

Foundation in Arts **Jul 2022 – Jul 2023**

Sunway College, Malaysia

CGPA: 3.38 / 4.00

LANGUAGES

English | Chinese | Cantonese | Malay
